

Cybersecurity for Contracting Professionals

Course Number: 1040

Length: 2 Days

Primary Delivery Method: Instructor-led live classroom

Alternative Delivery Methods: Instructor-led online (synchronous)

Course Description

Learn how to safeguard your contracts by understanding today's rapidly changing cybersecurity regulations and their impact on the contracting world. You will become vigilant in watching for any cybersecurity threats and be able to quickly react to any possible breach.

Note: This course is focused on government and contractor systems and the sharing of controlled unclassified information (CUI) as part of the acquisition process.

Intended Audience

This course is intended for contracting personnel in the federal government and commercial sectors who want to know how cybersecurity regulations affect their contracts and how their organization can remain compliant.

Course Learning Objectives

- Examine cybersecurity threats and the role contracting professionals play in cybersecurity management
- Determine which cybersecurity laws and regulations apply to your contracting organization
- Measure the impact of various cybersecurity standards, controls, and frameworks on federal acquisitions
- Evaluate potential cybersecurity threats during acquisition planning and contract performance

Course Additional Features

- Producer Support
- Technical Support Team
- Dedicated In-House Accessibility/Section 508 Compliance
- Student Resource Guides

All details about the Additional Features are available on this page. [Click here to Explore](#)
