

# Intermediate Agile Techniques for Contracting Professionals

Course Number: 1042

Length: 2 Days

Primary Delivery Method: Instructor-led live classroom

Alternative Delivery Methods: Instructor-led online (synchronous)

## Course Description

Learn methods for executing Agile information technology projects to meet project management mandates set by the Office of Management and Budget (OMB) and Office of Federal Procurement Policy (OFPP). As the government moves toward a more adaptive acquisition framework, you must employ Agile-based project management approaches to accomplish the acquisition strategy. You will discover how to use flexible acquisition techniques that align with less rigid procurement policies and procedures through scenario-based exercises.

## Intended Audience

This intermediate-level course is for federal acquisition and contracting personnel and others involved in the acquisition process who need to know how the U.S. government is shifting its approach to the use of more adaptive procurement procedures and policies to support project completion by modular development methodologies.

## Course Learning Objectives

- Describe Agile concepts and methodologies in the Federal acquisition environment
- Determine the acquisition and pricing strategies and techniques appropriate for Agile projects and programs
- Apply quality-focused acquisition methodologies in Agile projects and programs
- Determine the most effective methods to use when simplifying deliverables, choosing an acquisition vehicle, or meeting reporting and compliance requirements

## Course Additional Features

- Producer Support
- Technical Support Team
- Dedicated In-House Accessibility/Section 508 Compliance
- Student Resource Guides

All details about the Additional Features are available on this page. [Click here to Explore](#)
