

Comprehensive Overview of Federal Risk Management

Course Number: 5018

Length: 2 Days

Primary Delivery Method: Instructor-led online (synchronous); Instructor-led live classroom

Alternative Delivery Methods: Instructor-led online (synchronous)

Course Description

Explore the principles, practices, and processes of risk management as they relate to federal government operations. In this course, you will learn about and apply the federal risk management framework; risk identification, assessment, and monitoring; and strategic risk management. You will also discover how risk management relates to Enterprise Risk Management and the internal control program.

Intended Audience

This course is designed for any federal professional who wishes to understand the complexities and nuances of risk management in a federal agency.

Course Learning Objectives

- Describe risk and risk management as they relate to federal government operations
- Define the requirements and application of the risk management framework within the federal government
- Apply risk identification processes in federal government activities
- Evaluate risks in federal government activities
- Evaluate and propose risk responses for federal government activities based on risk analyses

Course Additional Features

- Producer Support
- Technical Support Team
- Extended Learning Bursts
- Dedicated In-House Accessibility/Section 508 Compliance
- Student Resource Guides

All details about the Additional Features are available on this page. [Click here to Explore](#)
