

Applying Agile Scrum Master Practices in the Federal Environment

Course Number: 6005

Length: 2 Days

Primary Delivery Method: Instructor-led live classroom

Alternative Delivery Methods: Instructor-led online (synchronous)

Course Description

Discover how Scrum Masters using an Agile framework can effectively implement adaptive approaches to product design, development, and deployment in the context of federal project management. You will learn the roles and responsibilities of a federal Scrum Master during a project's lifecycle. Upon completion of this course, you will be able to effectively implement Scrum processes and practices in the federal environment and support other Agile/Scrum members on the road to project success.

Intended Audience

The federal Scrum Master course is suitable for federal contractors, managers, programmers, testers, analysts, product managers, and anyone who is interested in becoming a practicing Scrum Master in the federal environment.

Course Learning Objectives

- Understand and describe concepts of the Agile/Scrum environment
- Apply Agile framework principles and techniques
- Examine the components of Scrum Master planning
- Analyze techniques and tools of successful federal Scrum Masters
- Examine how to manage and monitor Scrum projects

Course Additional Features

- Producer Support
- Technical Support Team
- Dedicated In-House Accessibility/Section 508 Compliance
- Student Resource Guides

All details about the Additional Features are available on this page. [Click here to Explore](#)
