

Transitioning to Agile Practices in the Federal Environment

Course Number: 6006

Length: 1 Day

Primary Delivery Method: Instructor-led live classroom

Alternative Delivery Methods:

Course Description

Learn how the application of Agile methodologies to federal projects is more than just changing product development or contracting practices—it is a mindset. This course addresses strategies, practices, and quality concepts that help facilitate a transition to effective Agile practices that will transform and empower your organization thereby providing maximum value to the customer and contributing to the long-term success of your organization's goals.

Intended Audience

This course is geared toward leaders, managers, and teams who are adopting Agile project management to improve project delivery, and complement and enhance traditional project management rigor.

Course Learning Objectives

- Describe the differences between Agile and predictive project management
- Define effective principles for instilling an Agile mindset in your organization
- Identify practices for leveraging Agile in your organization
- Describe the Agile acquisition strategies needed when executing an Agile project
- Explain the quality management concepts that support Agile projects

Course Additional Features

- Producer Support
- Technical Support Team
- Extended Learning Bursts
- Dedicated In-House Accessibility/Section 508 Compliance
- Student Resource Guides
