

FPM 512 - FAC-P/PM IT Core-Plus: IT Management, Security, and Performance Assurance

Course Number: 6019

Length: 4 Days

Primary Delivery Method: Instructor-led live classroom

Alternative Delivery Methods: Instructor-led online (synchronous)

Course Description

Address the specialized knowledge and abilities unique to IT projects areas through this course focused on the FAC-P/PM IT Core-Plus specialization program. You will focus on technical performance outcomes to satisfy competencies related to IT management, security, and performance assurance. You will learn these skills and techniques through robust content, federal examples, and hands-on exercises.

Intended Audience

This course is designed for IT Project managers who have completed their FAC-P/PM certification at the Mid-Level and must obtain the FAC-P/PM IT Core- Plus Specialization.

Course Learning Objectives

- Examine information technology (IT) knowledge domains of the federal government
- Select tools, equipment, and technologies used to assist individuals with disabilities to use computer equipment and software
- Operationalize the principles, procedures, and tools of federal data management
- Gather, organize, and maintain information residing on information management systems
- Assess the effectiveness and practicality of information technology systems using principles, methods, and tools
- Administer the principles, methods, and techniques of IT assessment, planning, management, monitoring, and evaluation
- Discover and implement new developments and applications of IT (hardware, software, telecommunications), emerging technologies to business processes, and information systems to meet organizational requirements
- Implement the principles, methods, and tools for the coordinated management of an IT program, to include providing oversight of multiple IT projects, integrating dependent schedules and deliverables, and related activities

Course Additional Features

- Producer Support
- Technical Support Team
