

Project Management Simulation

Course Number: 6106

Length: 4 days

Primary Delivery Method: Instructor-led online (synchronous); Instructor-led live classroom

Alternative Delivery Methods: Instructor-led live classroom

Course Description

Turn project management theory into real-world application as you synthesize and apply your skills to common project management scenarios. From creating a work breakdown structure to generating a schedule to analyzing risk, you will complete every step of the project management process, using tools, templates, and project management software.

Intended Audience

This course is intended for advanced-level program and project managers.

Course Learning Objectives

- Identify stakeholders and determine their roles
- Tailor your project management approach based on project characteristics
- Create a plan to provide early warning of potential risk events
- Actively involve your team in project planning and the creation of a shared vision
- Evaluate project status and monitor progress
- Negotiate a baseline with a customer
- Use exception management techniques to address trouble spots
- Close out a project and capture lessons learned

Course Additional Features

- Producer Support
- Technical Support Team
- Dedicated In-House Accessibility/Section 508 Compliance
- Student Resource Guides

All details about the Additional Features are available on this page. [Click here to Explore](#)
