

Assessing and Recovering Troubled Projects

Course Number: 6184

Length: 2 Days

Primary Delivery Method: Instructor-led live classroom

Alternative Delivery Methods:

Course Description

Examine ways to implement corrective action to get troubled projects back on track and successfully completed. Understanding both the human and process dimensions of successfully assessing and recovering challenged projects is key. You will learn to determine the symptoms of a challenged project, create an assessment and recovery process, and prevent future project failure. In addition, you will practice the concepts and knowledge you have gained through team exercises.

Intended Audience

This course is intended for advanced level Program and Project managers.

Course Learning Objectives

- Analyze scenarios to identify symptoms of challenged projects
- Establish a process for assessing and recovering challenged projects
- Demonstrate the assessment and recovery process initiating phase
- Explain the assessment and recovery process planning phase
- Explain the assessment and recovery process assessment phase
- Explain the assessment and recovery process recovery phase
- Explain the assessment and recovery process managing and transition phase
- Discuss the prevention of challenged projects
- Create an on-the-job action plan
