

Value-Driven Project Management

Course Number: 6191

Length: 2 Days

Primary Delivery Method: Instructor-led live classroom

Alternative Delivery Methods: Instructor-led online (synchronous)

Course Description

Explore how value is a key driver in the decisions and management of projects and programs. You will gain insights into how value-driven project management shapes stakeholder perceptions of business, strategic, and operational outcomes. You will learn the necessary knowledge and methods to integrate value-driven principles effectively into your project and program management work.

Intended Audience

Practicing project and program managers who seek to enhance their decision-making in project planning, execution, and control through value-driven methods, striving to maximize value for their company and stakeholders, and project team members who need to understand the principles of value driven projects.

Client-Provided Facility Requirements

- Break-out rooms

Course Learning Objectives

- Describe key value-driven principles and concepts
- Identify and prioritize value-driven project objectives during project initiation
- Create a value-driven project plan
- Identify and use value-driven execution strategies
- Assess performance outcomes and determine plan improvements to increase value
- Design value-driven communication strategies and progress reports for effective stakeholder communications
- Assess value realization metrics and identify continuous improvement opportunities for your projects/programs

Course Additional Features

- Producer Support
