

FPM 231 - Applications in Project & Program Management

Course Number: 6889

Length: 4 Days

Primary Delivery Method: Instructor-led live classroom

Alternative Delivery Methods: Instructor-led online (synchronous)

Course Description

Gain the systems management skills to address challenges, shifting priorities, and public demand to deliver high-quality results. A foundation in the requirements development process sets the stage for furthering your abilities in decision analysis methods and technical assessments—all in support of systems management. You will apply what you learn by participating in hands-on, experiential exercises. This course meets the requirements for the Federal Acquisition Certification for Program and Project Managers (FAC-P/PM) at the Mid-Level.

Intended Audience

This course is intended for program and project management professionals seeking their FAC-P/PM Mid-Level certification.

Course Learning Objectives

- Illustrate the federal acquisition process and the key planning documentation used by program managers
- Analyze the role of the program manager in developing and managing requirements
- Discuss key technical management processes and tools used in systems engineering
- Evaluate the importance of the test and evaluation (T&E) process in acquisition decisions
- Discuss the application of total lifecycle systems management (TLCSM)
- Create an on-the-job (OTJ) action plan

Course Additional Features

- Producer Support
- Technical Support Team
- Extended Learning Bursts
- Dedicated In-House Accessibility/Section 508 Compliance
- Student Resource Guides
- AI Prompts

All details about the Additional Features are available on this page. [Click here to Explore](#)
