

Frequently Asked Questions

Course Title: Agile Project Management for the Federal Environment

Course #: 6010

Duration: 3 Days

Delivery Method: Instructor-led live classroom

Alternative Delivery Methods: Instructor-led online (synchronous); Self-study online

1. What business or organizational need does this course address?

Stay current with the best practices of Agile and explore how the tenets of Agile have transformed federal project management with this introductory course. You will learn Agile PM methodologies that apply to the federal environment, including acquisitions and non-IT projects. You will focus on value, not cost, with the overarching idea that project managers are team leaders who work with the customer rather than against them.

2. Who should attend?

This course is intended for entry and intermediate level program and project managers and team members.

3. What will I learn how to do in this course?

- Examine the differences between Agile project management and typical project management
- Describe the philosophy and framework of Agile development
- Examine the principles and practices using Scrum as a primary Agile project management process
- Review the unique characteristics of implementing Agile within the federal environment
- Discover what is needed to initiate an Agile project
- Demonstrate what is involved in planning an Agile project
- Examine what is involved when executing an Agile project
- Practice approaches for monitoring and controlling an Agile project
- Explain the steps involved in closing out an Agile project
- Discuss how to adapt Agile project management for the federal environment

4. What kinds of activities are included in this course?

Presentation, class discussions, practical activities, and group and individual exercises

5. Are there prerequisites for this course?

Suggested:
