

Frequently Asked Questions

Course Title: Project Risk Management

Course #: 6103

Duration: 3 Days

Delivery Method: Instructor-led live classroom

Alternative Delivery Methods: Instructor-led online (synchronous); Self-study online

1. What business or organizational need does this course address?

Explore risk management best practices to ensure that projects adhere to time frames, budgets, and quality requirements while mitigating risk. You will learn different approaches to risk management, including how to rank and respond to risk, monitoring and controlling risk, and communicating risks throughout the project lifecycle. Risk is inevitable—but it doesn't have to completely derail your project's success.

2. Who should attend?

This course is intended for intermediate-level program and project managers.

3. What will I learn how to do in this course?

- Apply scalable planning methods to prepare for project risk management
- Prepare a risk management plan to guide your risk approach
- Identify project risks by using different identification tools
- Integrate risk management techniques and results into a balanced project management approach
- Use multiple techniques to identify and document risks
- Perform qualitative risk analysis to prioritize risks for response and monitoring
- Perform quantitative risk analysis to assess risk to the overall project cost and schedule objectives
- Incorporate expected value, probability, and distribution into your risk analysis
- Estimate and characterize the impact and timing of risks on your project
- Determine and implement appropriate risk response strategies based on risk analysis
- Monitor and control identified and emerging risks based on the risk management plan and project execution results
- Communicate risks effectively to all project stakeholders

4. What kinds of activities are included in this course?

Presentation, class discussions, practical activities, and group and individual exercises

5. Are there prerequisites for this course?
