

Frequently Asked Questions

Course Title: Project Management Simulation

Course #: 6106

Duration: 4 days

Delivery Method: Instructor-led online (synchronous); Instructor-led live classroom

Alternative Delivery Methods: Instructor-led live classroom

1. What business or organizational need does this course address?

Turn project management theory into real-world application as you synthesize and apply your skills to common project management scenarios. From creating a work breakdown structure to generating a schedule to analyzing risk, you will complete every step of the project management process, using tools, templates, and project management software.

2. Who should attend?

This course is intended for advanced-level program and project managers.

3. What will I learn how to do in this course?

- Identify stakeholders and determine their roles
- Tailor your project management approach based on project characteristics
- Create a plan to provide early warning of potential risk events
- Actively involve your team in project planning and the creation of a shared vision
- Evaluate project status and monitor progress
- Negotiate a baseline with a customer
- Use exception management techniques to address trouble spots
- Close out a project and capture lessons learned

4. What kinds of activities are included in this course?

Presentation, class exercises, and case studies.
